You have bought a PBT HUNGARY product. This product is specially designed for the fencing sport and made according to the latest FIE guidelines.

This product is allowed to fencing practice during training, national competitions and competitions appointed by the FIE. It cannot be used alone and must be associated with the other parts of the fencing uniform, according to the indications of the International and National Fencing Federation. Consult with your fencing coach!

#### Material

Hand: 800N fabric-70% polyethylene, 30% polyester, synthetic leather: 60% polyamid, 40% polyurethane, Foam lining.  
Cuff: 50% polyester, 50% cotton (350N textile), rubber and velcro.

This glove is available for the practice of the 3 weapons. 

For the practice of electric sabre use a glove with a metallic cuff or the special sabre glove. Right-handed  and Left-handed  must wear a right or left glove respectively. The athlete has to wear a size to fit so that a free

movement will be allowed, without floating. Measure **A** indicated in the table here above is the turn of the hand without the finger. Always close the opening for the wire with the Velcro. Check regularly the condition of the leather and the sewing. Broken or damaged gloves must not be worn! It is forbidden to use damaged gloves, even for the training.

#### Maintenance

Wash in 30°C warm water and use only neutral detergents

Do not wash in whitening or aggressive detergent

Do not iron

Do not machine dry or spin dry

#### Caution

According to the FIE rules (Chapter 4 point 15) the fencers equip at his own risk, wears the clothing and fights at his own risk. The broken fencing blade represents a special danger, the consequences of which – sometimes serious injuries – cannot be avoided by even the best designed and manufactured protective clothing.
